SUMMARY

I am a **Software Developer** who builds solid, well-structured web applications focused on usability, performance, and maintainability. I enjoy working on real-world projects where clarity, reliability, and scalability truly matter. I aim to contribute to long-term, large-scale projects and deliver solutions that are both robust and user-centered.

EXPERIENCE

Web Developer

Freelancer

June 2023 - Present, Remote

- Engineered responsive web applications by integrating client feedback and implementing adaptive design principles, ensuring compatibility across multiple devices and browsers.

Frontend Developer

Ouz Agency

March 2025 - June 2025, Ouz.ma

- Developed high-performance web applications featuring responsive design.
- Engineered feature-rich web modules by leveraging the latest frameworks and adhering to accessibility standards, elevating user experience and cross-device compatibility.

PROJECT

Marrakesh Travel Services

www.marrakeshtravelservices.com

- Designed and developed a fully responsive travel & tourism website to showcase **tours, excursions, transfers, activities, and travel packages** in Morocco
- Integrated secure booking and payment systems, streamlined user navigation, and optimized content for multilingual audiences to enhance visibility and customer engagement.

Zouggari Transport

- Developed a website for Zouggari Transport, a premium vehicle and tourist transport service based in Marrakech, Morocco.
- Built responsive, multi-language navigation (English & French) to serve a diverse audience and improve accessibility.

Luz (SaaS Dashboard)

- Built a SaaS dashboard offering real-time analytics and full user management using **Next.js** and **Tailwind CSS**.
- Implemented role-based user management and secure session handling for multi-tenant scenarios.

TierraBlanca

www.tierrablanca.ma

- Designed and developed a full e-commerce website for a **handmade home decor brand**, showcasing artisan-crafted decorative products.
- Built structured product pages with detailed descriptions, high-quality visuals, and inquiry/checkout flows to increase customer engagement.

Turath

- Designed and developed an official showcasing website for the Turath Association to present its mission, projects, and community impact.
- Structured dedicated sections for **projects, volunteers, partners, and organizational information** to improve clarity and accessibility.

EDUCATION

Bachelor of Science in Computer Science

Sup'Ingénierie • Tetouan, Morocco • 10/2023- Present

- Private higher education school accredited by the Ministry of Higher Education of Morocco, member of the European Federation of Schools (FEDE) since 2010.
